PROJECTS

DressMeAI

TechStack - ML, NLP, Django, Python, JS

02/2023 - Present

- AI based shopping website that displays the required products according to the description.
- Advanced features like Chatbot, Image searching, Instock notification through E-mail.
- Collaborated with a team of three members. As a backend developer I implemented notification and recommendation part using Machine Learning model.

Admission Process Automation System

Skills used- PHP, MySQL, HTML, CSS

10/2022 - 12/2022

- Successfully managed to collect application materials, including forms, documents, and student preferences, to ensure the accurate and timely processing of admissions.
- Published results based on the preferences of the students.
- I leveraged my expertise in SQL and develop a database schema design and worked in frontend.

Book Recommendation System

TechStack - Python, Machine Learning

10/2022 - 11/2022

- Developed a model that recommends books based on user interests using the NearestNeighbors algorithm.
- Demonstrated proficiency in data loading, model initialization, and application development using Streamlit.
